

Cleans | Disinfects | Deodorises

## MOLECULAR ODOUR NEUTRALISATION & BROAD SPECTRUM DISINFECTANT CLEANS | DISINFECTS | DEODORISES

10 Seconds Immediate Action | Prevents Scale Buildup

MUST FOR:

- Hospital Washrooms
- Ward Washrooms
- Bathroom Surfaces
- Hospital Wards
- Passages and Corridors
- Medical Waste Disposal
- Drainage Systems
- Open Sewage Lines

### › PRIMARY FUNCTION

Advanced Molecular Odour Neutralisation & Broad Spectrum Disinfectant Technology for Modern Sanitation

Hospitals and healthcare facilities face significant sanitation challenges due to biological waste, frequent cleaning cycles, and strict hygiene requirements. Persistent odours from bodily fluids, medical waste, washrooms, and high-use clinical areas can affect patient comfort and overall perception of cleanliness. Traditional cleaning agents such as phenyl, bleach, and fragrance-based deodorants often mask odours temporarily, requiring frequent reapplication and high chemical usage.

RAPITANT BioSafe is an advanced sanitation technology designed for demanding healthcare environments. Using molecular odour neutralisation chemistry, it binds with odour-causing compounds rather than covering them with fragrance. This provides longer-lasting freshness, improved hygiene conditions, and efficient sanitation performance across hospital facilities.

The technology is suitable for washrooms, patient rooms, corridors, waste collection areas, and clinical environments, delivering effective disinfection combined with persistent odour elimination

### › PERFECT FOR USE IN

- > Hospital Washrooms
- > Ward Washrooms
- > Medical Waste Disposal
- > Hospital Wards
- > Passages and Corridors
- > Drainage Systems

### HOW DOES RAPITANT BioSafe WORK

- > Spray and in 10 Seconds the Odours dissipated.
- > Dilute 100 ml of the Rapitant BioSafe concentrate with 1 Litre of water and:
- > Spray in and around the urinals.
- > Spray on the wall and wipe with a clean cloth if required.
- > Use to mop the floor.
- > Pour in the drains to reduce odour push back.
- > Repeat every 3-4 hours.
